Skills

Effective interpersonal skills. Futuristic

Flexibility	I am open to suggestions and feedback, whether from an employer or a client. Capable of listening attentively to any feedback I receive and open to making necessary changes to improve satisfaction.
Great communication	I am also able to explain my ideas in such a way as to make others want to support and finance my projects.
HTML5(also pug) / CSS3 (SCSS, Less)/ Bootstrap3/4.	Solid knowledge. Experience in developing my own project "HR-Portal". Adaptive layout experience on Bootstrap 3/4;
Javascript/TypeScript (ES5/ES6+)	Advanced knowledge. I have created a lot of projects which are on my GitHub account.
ReactJS + Redux(+thunk)	Created my own big project called "HR-Portal" which uses React and Redux, and works with my own backend REST API via Fetch-requests.
Angular 2+	Developing web application and working with REST API. In learning progress.
WebPack and Babel	Confident use of WebPack and Babel on this projects. Experience with configuration (plugins and dependencies installation).
Experience with Backend (Node.js + Express.js)	I'm experienced in establishing fully working back-end for system functionality for my own project.. Also used JWT-authentication.
Understanding the principles of AJAX, WebSocket	Have multiple experiences with AJAX-related projects working with REST API.

Work with Git version control via GitHub and Microsoft Azure.

Strong understanding the principles of OOP, MVC.
